

Stainless Steel Plastic Headed Nails & Pins

Suitable for

Our stainless steel, plastic headed pins and nails can be used inside and out, on a wide range of construction and building applications, e.g. fascia & soffit, barge boards, skirting & architrave, cladding, caravan and portable building construction, windows or door trims.

Nail Material

A2 stainless steel, annular ring shank to neck of nail for high pull out values.

Head Material

HDPE impact resistant head: UV Factor 5 stabilised colours: white, brown, black, and tan. We can manufacture any colour, however this would be subject to minimum production runs.

Sizes

Pins 2.0mm x 25mm/ 30mm/ 40mm
Nails 3.35mm x 40mm/ 50mm/ 65mm

Colours

White, brown, black and tan. Bespoke colours can also be manufactured, (see above).

Packaging

Nails in boxes of 100, Pins in boxes of 250.
We will over label the boxes with a description, computer code and batch number. Should you require company name, part code or bar code printing this may be added.
